Step 1: Choose a Theme

Start by deciding on a theme for your quiz. Themes can range from pop culture references, nature, historical figures, or even specific hobbies. A well-defined theme will help guide your image selection and make the quiz more coherent.

Step 2: Gather Images

Once you have your theme, the next step is to gather a selection of images. Aim to have a mix of easy, moderate, and challenging images to keep participants engaged. Ensure that the images are clear and relevant to your theme.

Step 3: Create Questions

For each image, formulate a question that prompts participants to guess what it is. Be creative with your questions; they can be straightforward or require a bit of lateral thinking. For instance, instead of asking “What is this animal?”, you might ask, “Which playful creature often enjoys beaches and surfboards?”

Decide how you want to present your quiz. You can choose between a digital format using platforms like Kahoot or Google Forms, or a traditional paper format. Digital quizzes allow for more interactive elements, while paper quizzes can be more personal and intimate.
