The core concept revolves around capturing and training various creatures known as Pokémon, which trainers battle against each other.

The Pokémon universe is divided into regions, each featuring unique Pokémon species. As of October 2023, there are nine generations of Pokémon, each introducing new creatures, gameplay mechanics, and lore. The first generation, which includes iconic Pokémon like Pikachu, Bulbasaur, and Charizard, laid the foundation for future expansions. Understanding the different generations and their respective Pokémon is crucial for anyone trying to name all Pokémon accurately.
